"The long awaited sequel to the worldwide best-seller Chariots of the gods."

We live in an age of information. But there are things in our prehistory "about which we do not have the faintest idea," writes best-selling author Erich von Däniken in his gripping new book, *Remnants of the Gods*. Stone structures erected by master builders, mysterious underground complexes, geometrically aligned stone circles, the breathtaking pyramids of Egypt—who built them? And, perhaps more importantly, where did these builders obtain such incredible knowledge? Erich von Däniken shows in detail how whole countries were surveyed thousands of years ago. Hundreds of Stone Age holy places are located at equal distances from one another, forming giant squares and triangles. How was all of this possible? Classic archaeology provides no answers to these questions. Worse still, it doesn't even appear to be interested. Are we all threatening to become "camp followers of disinterest," as Erich asks? Featuring more than 160 color photos and illustrations, Erich reveals the secrets of "impossible buildings" in Europe and the Mediterranean region, describes "crazy facts," and relentlessly exposes false doctrines. *Remnants of the Gods* will make even strident skeptics reconsider what they think they know of the past.

Three spellbinding volumes from the bestselling writer who defied conventional theories of archaeology, religion and history to prove his premise that the first gods to appear on Earth were visitors from outer space.

The father of the ancient alien theory with more than 65 million books sold reveals everything he has withheld for years. In all his years of service, why didn't Erich von Däniken ever doubt his theory that inhabitants of other planets had come into contact with humanity ages ago, and that they still observe us today? How could von Däniken in all these years say firmly that the UFO phenomenon is real and that people are being abducted by aliens? Why does he repeatedly criticize the official historiography and our religions and thus accept scorn and hostility? The answers to these questions are: Because Erich von Däniken spoke to people who supported his theories. Because people who saw UFOs or were kidnapped by aliens trusted him. And because experts and insiders inaugurated secrets known to only a few people. In this book, the now 81-year-old presents selected eyewitnesses and insiders for the first time, reveals secrets and stories that he has hitherto kept private, and presents reports and revelations that leave one speechless!

The author takes a look at the Voynich manuscript, the Book of Enoch, a lost subterranean labyrinth in Ecuador, and the mysterious lines in the desert of Nazca.

Ancient humans had the natural urge to document the world in which they lived, a fact that is evident in the cave paintings and carvings that still exist today. Why do rock paintings from various sites around the world all seem to depict the same things? Did the peoples of the prehistoric world have contact with each another? Is it possible that some were transported to far-flung locations in what our ancestors could only have described as "flying chariots"? Erich von Däniken, one of the best-selling authors of all time and regarded by many as the father of the ancient alien theory, continues his mission to uncover Earth's ancient past—this time with more than 150 extraordinary full-color photographs—in *Evidence of the Gods*. This extensively illustrated book features never-before-seen photographs from his unique archive, compiled throughout decades of searching around the world for traces of the cosmic gods whom he believes came to Earth thousands of years ago. *Evidence of the Gods* offers the best and most impressive evidence to date, along with concise explanations for the images, to bolster the case that von Däniken has already been making quite convincingly for years. *Evidence of the Gods* is his most convincing—and thoroughly entertaining—work yet. Did extraterrestrial visitors really leave their unmistakable traces on our planet thousands of years ago? The

images will speak for themselves.

The author of Chariots of the Gods presents astounding theories about alien contact with Earth from ancient history—updated with new evidence from his research into formerly inaccessible sites. Why do flying machines and astronauts appear in the artworks and sacred texts of all ancient cultures? What is the meaning of the immense earth drawings, impossible to view from the ground, that can be found all over the globe? How could prehistoric cultures have engraved diorite and other hard rock with such incredible precision without the use of modern tools? In this mind-bending new book, Erich von Däniken—bestselling author and expert on extraterrestrial influences on early civilization—draws on his latest research to update his astounding theory that the inhabitants of other planets have kept in contact with humankind since the earliest times. • Assess for yourself the stunning visual evidence presented in some 200 photographs. • Examine previously unpublished testimony from expert informants. • Discover new research undertaken by von Däniken after the opening up of previously inaccessible regions, such as the jungle city “Buritaca 200” in Colombia. Featuring profiles of Machu Picchu, the Nazca Lines, and other archaeological mysteries, Impossible Truths shines a startling new light on the true relationship between alien species and humankind.

Bestselling author and father of the Ancient Alien Theory Erich von Däniken explores what drove ancient humans to build city-sized places underground around the world and its connection to conflicts in the sky. War of the Gods examines ancient scriptures from India, Siberia, Tahiti, and many other regions of the world independently on reports of battles in the stars. Weapons of unimaginable destructive power were used in the battle. Use of one of these weapons destroyed a planet completely. Traditions from all over the world depict the gruesome effects of the battle in space. Many ancient stories speak of it raining fire from the sky for years. The people of the time tried to protect themselves from this, and thus created more testimonies that prove the star war and contact with beings from other planets. With impressive examples von Däniken illustrates some of the numerous cities that were dug underground as safe harbors from the destructive boulders. Miles and miles of underground passageways have been discovered around the world as they made space for villages and entire cities. To end the book, von Däniken presents his newest discoveries of an event that can only be described as shocking: In 2017, the author was informed that strange mummified creatures were found near the Peruvian village of Nazca. They lived several thousand years, had three fingers and three toes, and had exceptionally long heads. One of the mummies, apparently several thousand years ago, had been implanted with a metal plate under the skin. Scientists agree: These creatures are not from Earth!

All over the world there are fantastic ruins and objects that cannot be explained by conventional history, archaeology or religion. In the groundbreaking Chariots of the Gods, Erich von Daniken provides answers to these questions...why do religious texts often refer to Gods who descend from fiery chariots? Why do modern space launch sites look like constructions on the plains of Nazca in Peru? Was God an astronaut? By looking at human history and the ruins of ancient civilisations with an open mind, Erich von Daniken offers a new solution to these eternal mysteries in Chariots of the Gods. Why, for instance, do the world's sacred books describe Gods who came down from the sky in fiery chariots and always promised to return? How could an ancient Sanskrit text contain an account which could only be of a journey in an alien craft? Compare photographs of American space centre launch sites to the constructions on the plains of Nazca in Peru. In order to understand the mysteries which Erich von Daniken has catalogued we must go back to these ancient relics with an open mind. We must call in the resources and experience of sciences other than archaeology. Chariots of the Gods is a provocative attempt to explain some of the universe's most interesting mysteries. Erich von Daniken has spent a lifetime gathering evidence to prove that, before the dawn of recorded history, our ancestors were visited by an alien race. Erich von Daniken was responsible for popularising the ancient astronaut hypothesis of human development. Orthodox historians have been sceptical but a vast public have been drawn to his ideas by instinctive interest and wonder. His 26 books have sold over 60 million copies in over 40 languages.

Erich von Däniken's monumental Chariots of the Gods changed the way generations have looked at mythology, ancient history, and the possibility of advanced beings from other worlds visiting Earth. Now he tackles the history of Greece and again challenges our beliefs about how our civilization arose. Using painstaking archaeological research and evidence from the writings of Plato and Aristotle, he suggests that the Greek “myths” were, in fact, very much a reality, that the Greek “gods” were actually extraterrestrial beings who arrived on Earth many thousands of years ago. Many of you may find von Däniken's conclusions astounding, but they are argued with such vigor and clarity that you'll be forced to consider the implications of his findings for mankind. Odyssey of the Gods includes new, eye-opening information about: A revolutionary interpretation of the sites and legends of ancient Greece The conflict between “alien” gods and humans The true origin of centaurs, the Cyclops, and other “mythical” creatures A startling new explanation of the Atlantis legend
