Explaining both why theory is important and how to use it, Lois Tyson introduces beginning students of literature to this often daunting area in a friendly and approachable style. The new edition of this textbook is clearly structured with chapters based on major theories that students are expected to cover in their studies. Key features include: coverage of major theories including psychoanalysis, Marxism, feminism, lesbian/gay/queer theories, postcolonial theory, African American theory, and a new chapter on New Criticism (formalism)

A new novel with a dark political twist from "one of America's greats."* Man in the Dark is Paul Auster's brilliant, devastating novel about the many realities we inhabit as wars flame all around us. Seventy-two-year-old August Brill is recovering from a car accident in his daughter's house in Vermont. When sleep refuses to come, he lies in bed and tells himself stories, struggling to push

back thoughts about things he would prefer to forget—his wife's recent death and the horrific murder of his granddaughter's boyfriend, Titus. The retired book critic imagines a parallel world in which America is not at war with Iraq but with itself. In this other America the twin towers did not fall and the 2000 election results led to secession, as state after state pulled away from the union and a bloody civil war ensued. As the night progresses, Brill's story grows increasingly intense, and what he is so desperately trying to avoid

After she falls asleep, he at last finds the courage to revisit the trauma of Titus's death. Passionate and shocking, *Man in the Dark* is a novel of our moment, a book that forces us to confront the blackness of night even as it celebrates the existence of ordinary joys in a world capable of the most grotesque violence. *Time Out (Chicago)

Attached to the few objects around him are one-word, hand-written labels, and on the desk is a series of vaguely familiar black-and-white photographs and four piles of paper. Then a middle-aged woman called Anna enters and talks of pills and treatment, but also of love and promises. Who is this Mr Blank, and what is his fate? What does Anna represent from his past - and will he have enough time to ever make sense of the clues that arise? After the huge success of The

Philosophy and the Young Child presents striking evidence that young children naturally engage in a brand of thought that is genuinely philosophical. In a series of exquisite examples that could only have been gathered by a professional philosopher with an extraordinary respect for young minds, Gareth Matthews demonstrates that children have a capacity for puzzlement and mental play that leads them to tackle many of the classic problems of knowledge, value and existence that have traditionally formed the

core of philosophical thought. Matthews' anecdotes reveal children reasoning about these problems in a way that must be taken seriously by anyone who wants to understand how children think. *Philosophy and the Young Child* provides a powerful antidote to the widespread tendency to underestimate children's mental ability and patronize their natural curiosity. As Matthews shows, even child psychologists as insightful as Piaget have failed to grasp the subtlety of children's philosophical frame of mind. Only in children's literature does Matthews find any

sensitivity to children's natural philosophizing. Old favorites like Winnie the Pooh, the Oz books, and The Bear That Wasn't are full of philosophical puzzlers that amuse and engage children. More important, these stories manage to strip away the mental defensiveness and conventionality that so often prevent adults from appreciating the way children begin to think about the world. Gareth Matthews believes that adults have much to gain if they can learn to "do philosophy" with children, and his book is a rich source of useful suggestions for parents, teachers,

Faulkner's fiction. Both instructive and entertaining, this book will be of great interest to literary scholars and a helpful ancillary text as well.

Bockting has produced a work that focuses on the "people" that Faulkner created in his four major psychological novels: *The Sound and the Fury* (1929); *As I Lay Dying* (1920), *Light in August* (1932), and *Absalom, Absalom!* (1936). The author writes not about these people, either as literary characters or as human beings, but instead has allowed them to come alive

Psychostylistics is the innovative approach to the literary character that Bockting employs, bringing together new developments in narrative psychology and psychiatry with literary stylistics and mind-style to provide detailed textual and contextual evidence in support of its observations on personality. William Faulkner (1897-1962) remains the pre-eminent literary chronicler of the American South and a giant of American arts and letters. Creatively obsessed with problems of race, identity, power, politics, and family dynamics, he wrote novels, stories, and lectures that continue to shape our understanding of the region's promises and problems. His experiments and inventions in form and style have influenced generations of writers. Originally published in 1974

The Chicago Tribune said, "This is an overwhelming book, indispensable for anyone interested in the life and works of our greatest contemporary novelist." That invaluable 1991 edition is now back in print.
