Definitely required reading for everyone, especially if you are over 60. Sounds true to me, and this is a respected author. Please do not pass this over if you are taking ANY medications. and share it with your friends. I do think doctors will just tell you they are not interested in learning anything you read in a book, but it is your life, not theirs, so don't let them make you feel like ...

Are Your Prescriptions Killing You?: How to Prevent ...

Nearly 60% of the prescription medications taken by patients aren't needed. That's what researchers discovered in a study published in Archives of Internal Medicine. The study also revealed that 88% of patients said they felt healthier when taking fewer drugs. The fact is that adverse effects from medications are the fourth-leading cause of death in the US (after heart disease, cancer and stroke).

Are Your Prescriptions Killing You - ariabnb.com

It brings out enhanced emotions and elevated heart rates. It is an unyielding stimulant that can kill you. It can cause permanent psychological destruction because of the enhanced mood that the drug produces, and it may later cause heart failure leading up to your death. This is where you ask, 'why do people take such things?'
