Cross National Research Methods - Google Books

Comparative research is a research methodology in the social sciences that aims to make comparisons across different countries or cultures. A major problem in comparative research is that the data sets in different countries may define categories differently (for example by using different definitions of poverty) or may not use the same categories.

Cross-National Research Methodology and Practice by ...

This paper analyses the central concerns of selection and execution of cross-national qualitative research. Discussion is issue-driven, incorporating relevant publications on the basis of good practice. An assessment is made of the potential of the qualitative approach in cross-national settings, as well as its pitfalls.

Qualitative research methods in cross-national settings ...

The Cross-National Research Group was established in 1985 with the aim of providing a forum for discussion and exchange of ideas and experience between researchers from different social science disciplines engaged in cross-national comparative studies, for those planning to embark on cross-national projects and for policy-makers interested in exploiting the findings from international studies.

Cross-National Research Methodology and Practice by ...

A cross-sectional study involves looking at data from a population at one specific point in time. The participants in this type of study are selected based on particular variables of interest. Cross-sectional studies are often used in developmental psychology, but this method is also used in many other areas, including social science and education.

The Definition and Use of a Cross-Sectional Study

title = "Inside qualitative, cross-national research: Making methods transparent in a EU housing study", abstract = "Over the last decade there has been a significant growth in comparative, cross-national research and recognition of its potential significance in responding to globalisation pressures.
