For centuries the Bay of Bengal served as a maritime highway between India and China, and as a battleground for European empires, while being shaped by monsoons and human migration. Integrating environmental history and mining a wealth of sources, Sunil S. Amrith offers insights to the many challenges facing Asia in the decades ahead.

The Bay of Bengal Initiative for Multi Sectoral Techno Economic Cooperation (BIMSTEC) is a sub regional grouping. It is positively perceived as a bridge between the SAARC and the ASEAN regional groupings, as it embraces five SAARC members viz., Bangladesh, India, Sri Lanka Nepal and Bhutan and two ASEAN members, Myanmar and Thailand, around the Bay of Bengal and the Eastern Coast of the Indian Ocean Formed in 1997 with the main objective of promoting cooperation among the contiguous countries of

Get Free India And Bay Of Bengal Community The

the Bay of Bengal, the BIMSTEC has identified six agreed areas of cooperation, viz., trade and investment; technology; transport and communication; energy; tourism and fisheries. With the changing image and the recent economic clout India's increasing engagement with the ASEAN national collectively and individually is a positive step in the direction of its Look East policy. Though not all potential areas of sub regional cooperation in the BIMSTEC have received adequate attention in this volume, it is yet a pioneering effort in launching an exclusive

collected work on the subjects as the literature on the BIMSTEC is very inadequate and wanting.

On the world maps common in America, the Western Hemisphere lies front and center, while the Indian Ocean region all but disappears. This convention reveals the geopolitical focus of the now-departed twentieth century, but in the twenty-first century that focus will fundamentally change. In this pivotal examination of the countries known as “Monsoon Asia”—which include India, Pakistan, China, Indonesia, Burma, Oman, Sri

Get Free India And Bay Of Bengal Community The

Lanka, Bangladesh, and Tanzania—bestselling author Robert D. Kaplan shows how crucial this dynamic area has become to American power. It is here that the fight for democracy, energy independence, and religious freedom will be lost or won, and it is here that American foreign policy must concentrate if the United States is to remain relevant in an ever-changing world. From the Horn of Africa to the Indonesian archipelago and beyond, Kaplan exposes the effects of population growth, climate change, and extremist politics on this unstable region, demonstrating why Americans

This book reviews the past and provides new strategies to help BIMSTEC achieving a new paradigm of integration. It primarily deals with the regional cooperation and integration issues, and assesses policy priorities, effectiveness, implementation imperatives and challenges. Each chapter in this book tries to capture essential features of the crosscutting issues and attempts to draw some policy implications. The subject of this book will be of special interests to

This open access book discusses the impact of human-induced global climate change on the regional climate and monsoons of the Indian subcontinent, adjoining Indian Ocean and the Himalayas. It documents the regional climate change projections based on the climate models used in the IPCC Fifth Assessment Report (AR5) and climate change modeling studies using the IITM Earth System Model (ESM) and CORDEX South Asia

Get Free India And Bay Of Bengal Community The

datasets. The IPCC assessment reports, published every 6–7 years, constitute important reference materials for major policy decisions on climate change, adaptation, and mitigation. While the IPCC assessment reports largely provide a global perspective on climate change, the focus on regional climate change aspects is considerably limited. The effects of climate change over the Indian subcontinent involve complex physical processes on different space and time scales, especially given that the mean climate of this region is generally

Get Free India And Bay Of Bengal Community The
shaped by the Indian monsoon and the unique high-elevation geographical features such as the Himalayas, the Western Ghats, the Tibetan Plateau and the adjoining Indian Ocean, Arabian Sea, and Bay of Bengal. This book also presents policy relevant information based on robust scientific analysis and assessments of the observed and projected future climate change over the Indian region.
