Les nouvelles Hordes se lancent dans l'offensive finale – et les vaisseaux-spores tombent au pouvoir des désincarnés de la Ville Stellaire... À l'intérieur du Vazifar, l'ancien vaisseau amiral des Garbeshiens, Amtranik se réveille et prend le commandement des hordes de Laboris. Ralliant la planète Martappon, le chef garbeshien y reprogramme le Complexe pour que tous les nouveaux Orbitaux produits soient à ses ordres. 12 000 nefs coniques sont ainsi armées et appareillent pour une véritable croisade. Mais petit à petit, parmi les Orbitaux stationnés à proximité du Système Solaire, les informations propagées par Jen Salik et collectées par le Vario-500 commencent à semer le doute sur l'identité des Humains de la Galaxie avec les Hordes de Garbesh. Reconnu Chevalier de l'Abîme, Salik est invité à se rendre sur Martappon. Pendant ce temps, les six vaisseaux-spores en route vers la Voie Lactée sont abordés par d'étranges essaims cristallins : ce sont les esprits matérialisés des habitants d'Art-Yshall, la Ville Stellaire disparue. Grâce aux biophores, les "Citoyens d'Ysh" retrouvent leurs anciens corps et se heurtent aux Ufonautes venus préparer la remise des vaisseaux-spores aux Terraniens. Sous l'influence des quanta ôn et nôon, les androides accèdent à la conscience puis s'allient aux "Citoyens d'Ysh" qui, au dernier moment, renoncent à s'approprier les nefs géantes en réalisant que ce vol aurait des conséquences dramatiques. À nouveau transformés en cristaux, ils disparaissent dans l'espace tandis que les Ufonautes redeviennent des êtres sans esprit et que les vaisseaux-spores poursuivent leur route vers le Système Solaire.

La liste exhaustive des ouvrages disponibles publiés en langue française dans le monde. La liste des éditeurs et la liste des collections de langue française.

Contains essential bibliographic and access information on serials published throughout the world.

Includes entries for maps and atlases.

Includes, 1982-1995: Les Livres du mois, also published separately.

Tobacco use by adolescents and young adults poses serious concerns. Nearly all adults who have ever smoked daily first tried a cigarette before 26 years of age. Current cigarette use among adults is highest among persons aged 21 to 25 years. The parts of the brain most responsible for cognitive and psychosocial maturity continue to develop and change through young adulthood, and adolescent brains are uniquely vulnerable to the effects of nicotine. At the request of the U.S. Food and Drug Administration, Public Health Implications of Raising the Minimum Age of Legal Access to Tobacco Products considers the likely public health impact of raising the minimum age for purchasing tobacco products. The report reviews the existing literature on tobacco use patterns, developmental biology and psychology, health effects of tobacco use, and the current landscape regarding youth access laws, including minimum age laws and their enforcement. Based on this literature, the report makes conclusions about the likely effect of raising the minimum age to 19, 21, and 25 years on tobacco use initiation. The report also quantifies the accompanying public health outcomes based on findings from two tobacco use simulation models. According to the report, raising the minimum age of legal access to tobacco products, particularly to ages 21 and 25, will lead to substantial reductions in tobacco use, improve the health of Americans across the lifespan, and save lives. Public Health Implications of Raising the Minimum Age of Legal Access to Tobacco Products will be a valuable reference for federal policy makers and state and local health departments and legislators.
