Whenever a student decides to prepare for any examination, her/his first and foremost curiosity is about the type of questions that he/she has to face. We feel great pleasure to present this book " Physics Olympiad Stage 1 - NSEP 9 year solved papers " before you. Wherein, we have made an attempt to provide year wise collection of questions asked in NSEP with answers and solutions to the majority of questions. Solutions to the questions have been written in such a manner that the students will be able to understand the application of the concepts and can answer some other related questions too. We firmly believe that the book in this form will definitely help a genuine, hardworking student. We have tried our best to keep errors out of this book however, comments and suggestions from the readers will be highly appreciated and incorporated in the subsequent editions. We wish to utilize the opportunity to place on record our special thanks to all members of the Content Development team for their efforts to make this wonderful book.

The Asian Physics Olympiad (APhO) is a unique, single-subject, practical and theory-based individual competition in the field of physics. It was developed to provide young Asian students with a platform to display their physics knowledge. It is the celebration of the best in pre-university physics. Each year, for about one week, pre-university students from across Asia gather and test their theory and practical skills in physics. This book contains question papers in both theory and experiment and their solutions together with description of various activities of the 15th Asian Physics Olympiad held in Singapore from 11th to 18th May 2014. The book will serve as a valuable source of interesting and challenging experimental and theoretical topics for young physicists worldwide. Contents: Participating Delegations Speeches Opening Ceremony Closing Ceremony Committee Programme Results Participants Problems and Solutions Theory Problem 1 Theory Problem 2 Theory Problem 3 Experimental Problem Selected Translations International Board Statutes Syllabus Minutes of the International Board Meeting Newsletter Photos Readership: Students, lecturers and educators interested in high school physics. Key Features: Useful study guide for students training for Physics Olympiads and similar competitions Useful teaching guide for physics educators and those working in higher education Keywords: Physics Olympiad; Training; Physics Education; APhO; Singapore; Competition; NUS; A-STAR

This book compiles all of the test problems and solutions from the 1st through the 8th Asian Physics Olympiad. Test questions of every paper consist of two parts, a theory section and an experiment section, before which minutes of teams and results of each competition are introduced. It is a rather desirable reference book for both students and teachers of international competition training as well as middle school student contestants.

This volume tackles perceived myths surrounding the academic excellence of East Asian students, and moves beyond Western understanding to offer in-depth analysis of the crucial role that shadow education plays in students ' academic success. Featuring a broad range of contributions from countries including Japan, China, Taiwan, and Singapore, chapters draw on rich qualitative research to place in the foreground the lived experiences of students, teachers, and parents in East Asian countries. In doing so, the text provides indigenous insights into the uses, values, and meanings of shadow education and highlights unknown cultural and regional aspects, as well as related phenomena including trans-boundary learning culture, nomadic learning, individualized learning, and the post-schooling era. Ultimately challenging the previously dominating Western perspective on shadow education, the volume offers innovative theorization to highlight shadow education as a phenomenon which cannot be overlooked in broader discussion of East Asian educational performance, systems, and policy. Offering pioneering insights into the growing phenomenon of shadow education, this text will benefit researchers, academics, and educators with an interest in international and comparative education, curriculum studies, and East Asian educational practices and policy. Those interested in the sociology of education and educational policy will also benefit from this book.
