Discusses the ways in which parental attitudes shape the child's concept of himself and offers guidelines for creating positive relationships

After describing the functions of the PC and the role of computers in local and global networks, the authors explain the fundamentals of data management, as well as the support of firms' functions and processes through information processing. The concepts utilized are deployed in a multitude of modern and integrated application systems in manufacturing and service industries. These application examples make up the core of the book. Many application

examples illustrate the methodologies addressed.

Kioko had been watching the matatus come and go for as long as he could remember. But today, for his fifth birthday, he climbs aboard one with his grandfather. As the matatu pulls away from the market, the village dogs chase after them. When Kioko asks his grandfather why the dogs always bark and chase after matatus, his grandfather tells him an entertaining tale about a dog, a goat and a sheep. Set in East Africa, *The Matatu* is a colorful story filled with many unexpected turns and twists along the way.

This analytical study examines the function of internal auditing from the viewpoint of its role within organizations and within the economics of societies and governments. Swanson and Marsh place internal auditing in the context of the scientific conceptual framework of Living Systems Theory, and thus provide a basis for a systematic theoretical framework and a theory based on observable, measurable entities. They identify the advantages of using this system to advance the knowledge and understanding of organizations, and also propose a higher level of internal audit functions that can advance modern societies.

Searle's theory of social reality is increasingly meeting with worldwide recognition, and is undoubtedly the most prominent theory of social ontology (at least in the post-analytical tradition), even if actual research in this domain is engaged in critical confrontation with it. Searle's approach continues to shape the debate, but his construction is more and more sharply dissected, both in its details and in its general assumptions. Furthermore, new perspectives, not rooted in the analytical...

This edited book brings together an international cast of contributors to examine how academic literacy is learned and mastered in different tertiary education settings around the world. Bringing to the fore the value of qualitative enquiry through ethnographic methods, the authors illustrate in-depth descriptions of genre knowledge and academic literacy development in first and second language writing. All of the data presented in the chapters are original, as well as innovative in the field in terms of content and scope, and thought-provoking regarding theoretical, methodological and educational approaches. The contributions are also representative of both novice and advanced academic writing experiences, providing further insights into different stages of academic literacy development throughout the career-span of a researcher. Set against the backdrop of internationalisation trends in Higher Education and the pressure on multilingual academics to publish their research outcomes in English, this volume will be of use to academics and practitioners interested in the fields of Languages for Academic Purposes, Applied Linguistics, Literacy Skills, Genre Analysis and Acquisition and Language Education.

This book disseminates original research on learning in and from practice in pre-service teacher education. Authors such as Lederman and Lederman describe the student teaching practicum (or work-integrated learning [WIL]), which is an essential component of pre-service teacher education, as the

'elephant in the room'. These authors note that 'the capstone experience in any teacher education programme is the student teaching practicum... [a]fter all, this is where the rubber hits the road'. However, many teacher educators will agree that this WIL component is sometimes very insufficient in assisting the student teacher to develop their own footing and voice as a teacher. This is the 'gap' that this research book addresses. Most of the chapters in the book report empirical data, with the exception of two chapters that can be categorized as systematic reviews. WIL is addressed from various angles in the chapters. Chapter 6 focuses on research related to what makes Finnish teacher education so effective, and in Chapter 4 researchers of the University of Johannesburg disseminate their findings on establishing a teaching school (based on Finnish insights) in Johannesburg. Chapter 3 highlights the challenges faced in open-and distance learning teacher education contexts. Several of the chapters disseminate research findings on alternative interventions to classic WIL, namely, where "safe spaces" or laboratories are created for student teachers to learn and grow professionally. These could either be simulations, such as software programmes and avatars in the intervention described in Chapter 2; student excursions, as the findings in chapters 5, 7 and 10 portray; or alternative approaches to WIL (e.g. Chapters 11 and 12). The book is devoted to scholarship in the field of pre-service teacher education. The target audience is scholars working in the fields of pre-service teacher education, work-integrated learning, and self-directed learning. The book makes a unique contribution in terms of firstly its extensive use of Cultural-Historical Activity Theory as a research lens, and secondly in drawing on various theoretical frameworks. Both quantitative and qualitative research informed the findings of the book.

This fifth edition of *International Law: A South African Perspective* is now titled *Dugard's International Law: A South African Perspective*, in recognition of the fact that this work is a continuation of the earlier editions written by John Dugard. The substance of the work has undergone major changes to take account of new developments both on the international legal scene and in South Africa. *Dugard's International Law: A South African Perspective* presents a South African perspective of international law. The basic principles of international law are described and examined with reference to the principal sources of international law. This examination, however, takes place within the context of South African law. South African state practice, judicial decisions and legislation on international law receive equal treatment with international law as it is practised and taught abroad. The present work is designed to assist judicial officers and practitioners, educate students, and guide diplomats in the intricacies of international law both at home in South Africa and abroad.
